Place:

How long have you been studying astrology?

What level are you comfortable at? Please check one.

Novice: You know next to nothing, but want to learn.

Beginner: You know enough to be dangerous.

Intermediate: You know it, you get it, but when it comes to physical application things get a little gray.

Advanced: You know your material, and can safely navigate day to day life.

Expert: When you talk to people about astrology, you talk over their heads, but it is not intentional. It is out of passion for the art.

Professional: Enough said.

In order for me to know where you are with your own astrological knowledge, it is necessary for me to evaluate. Please keep in mind, though, that the only bearing this has is to assist me with where you're at. I'll keep this brief and to the point in the interest of efficiency, and if there are any questions, you can address them in the comments section at the end of this exam. Please answer the following questions to the best of your abilities, and trust me, it's not scary at all. On the following pages, I will be testing on the four main pillars of astrology: the signs, the planets, the houses, and the aspects. It will be a subject a page in length, so it shouldn't take that long at all. Upon completion, when you are ready, please email back to me. All results are confidential.

Astrological Signs

These are multiple choice questions. Only one answer per question, please.

1. What is the glyph for Aries?

Letter of Answer: _____

- A. ♈
- B. ♉
- C. ♂
